

a brilliant selection of colors!

Soft Lime

Fresh translucent tints, surfer neons or sassy solids...exciting earmold colors are available from Microsonic.

Pink Purple Green Red and Clear Multi-Color

For patients who'd like a bold, playful look, recommend dots, multi-colors or stripes of two to five colors. Or for wearers wanting a little glamour, specify Glitter Effects, available in nine different hues. For those preferring the softer look, Sparkles come in four varieties.

And for the most exciting 3-D colors, Gel-E-Bursts feature two or three bright, floating colorbursts in a crystal clear base!

Patients love them, and so will you. They're crafted to satisfy the most sensitive ear even when fitting a power BTE. Add a bright set of colors to your palette!

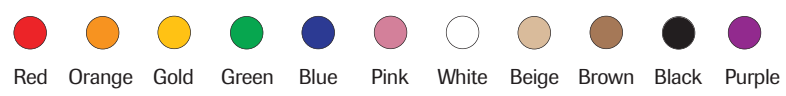

Blue and green Gel-E-Burst

dots, multi-colors or stripes

Description: Two to five colors. Color combinations are limited only by the imagination of the wearer!

Material: M2000 is recommended. It's our premium soft silicone, custom-blended exclusively for Microsonic. Excellent for earmold comfort. Also available in Acrylic, but choices are limited to three colors in this base.

glitter effects

Description: Clear or colored earmolds containing traditional glitter. Combine all for a multi-glitter.

Material: Clear or tinted M2000 silicone or acrylic.

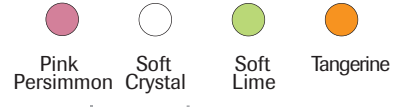

Multi-Glitter

sparkles

Description: Tinted earmolds with soft glitter.

Material: M2000 silicone or acrylic.

Orange, Green, Gold, Blue and Red Stripe

gel-e-bursts

Description: Two to three bright 3-D colors floating in a brilliant clear base.
