

# a brilliant selection of colors!

*Soft Lime*

*Pink Purple Green Red and Clear Multi-Color*

*Blue and green Gel-E-Burst*

*Multi-Glitter*

*Orange, Green, Gold, Blue and Red Stripe*

Fresh translucent tints, surfer neons or sassy solids...exciting earmold colors are available from Microsonic.

For patients who'd like a bold, playful look, recommend dots, multi-colors or stripes of two to five colors. Or for wearers wanting a little glamour, specify Glitter Effects, available in nine different hues. For those preferring the softer look, Sparkles come in four varieties.

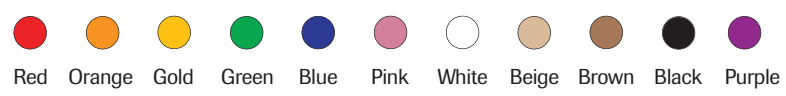

And for the most exciting 3-D colors, Gel-E-Bursts feature two or three bright, floating colorbursts in a crystal clear base!

Patients love them, and so will you. They're crafted to satisfy the most sensitive ear even when fitting a power BTE. Add a bright set of colors to your palette!

## dots, multi-colors or stripes

**Description:** Two to five colors. Color combinations are limited only by the imagination of the wearer!

**Material:** M2000 is recommended. It's our premium soft silicone, custom-blended exclusively for Microsonic. Excellent for earmold comfort. Also available in Acrylic, but choices are limited to three colors in this base.

## glitter effects

**Description:** Clear or colored earmolds containing traditional glitter. Combine all for a multi-glitter.

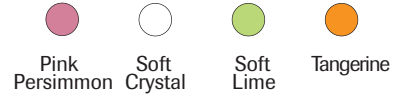

**Material:** Clear or tinted M2000 silicone or acrylic.

## sparkles

**Description:** Tinted earmolds with soft glitter.

**Material:** M2000 silicone or acrylic.

## gel-e-bursts

**Description:** Two to three bright 3-D colors floating in a brilliant clear base.
