

did you hear...

there is a new selection
of colors for kids!

Fresh translucent tints, surfer neons or sassy solids...exciting new earmold colors are now available in Rainbow and GlimmerEffects Custom Earmolds.

For patients who'd like a bold, playful look, recommend Rainbows in solids, or in a whirl of two to five colors. Or, for wearers wanting a little glamour, specify sparkling GlimmerEffects with optical glitter in six brilliant hues.

Patients love them, and so will you. They're crafted in your choice of acrylic or M2000 silicone to satisfy the most sensitive ear, even when fitting a power BTE.

So add a bright, new set of colors to your palette, then color a "kid" happy.
