

make something great...
even greater!

Open-fit hearing aids are highly effective and popular. And you can make them even better in many instances by adding a specially designed Microsonic earmold. You can offer your patients

- Increased comfort
- Improved retention
- In many cases, higher gain before feedback

Available in all materials, Microsonic's open-fit earmolds are easy to wear and allow simple in-office tube changes as needed. To ensure a perfect fit, please send the actual tubing unit selected for the patient along with the ear impression.

For further information, please phone us at **1-800-523-7672** or send us an email at **info@microsonic-inc.com**
