

hear's the difference.

For generations, Microsonic has been known to create high-quality, custom earmolds. Today, Microsonic is proud to introduce Micro-Fit Technology to further strengthen our reputation for the finest earmolds in the industry.

Micro-Fit uses laser technology integrated with specialized 3D software to produce high-quality custom earmolds. Micro-Fit earmolds offers our customers optimized comfort and acoustics.

At Microsonic, we will continue to dedicate our efforts towards leading edge technology and providing the customer with the best product and service available.
