MOTOR SPORTS - LifePlugs™ Riders

Many bikers wear helmets, boots, and gloves to protect themselves when riding, but hearing protection is often overlooked. It's possible to damage your hearing due to wind noise, so earplugs should be a priority every time you ride.

LifePlugs™ not only help to reduce noise fatigue while riding, they also provide clarity to sounds around you by dampening certain frequencies more than others. So, wear them to ride. Then wear them anywhere it's loud ... think restaurant, bar, music event.
